**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

1. please remove the reference to claim 1 in the specification (page 3).

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 02/097310 (WO '310) in view of Gurtler (4,371,174).

WO '310 discloses an oil ring having a working surface 13, upper and lower ring walls, a recess 12a for a spring, and surfaces 12 that form a wave shaped towards the ring back (see Fig. 7). WO '310 does not appear to disclose that the surfaces are phase shifted relative to each other. Gurtler discloses a piston ring having a working surface, upper and lower ring walls, and a surfaces 2 that form a wave-shape. Gurtler teaches that the surfaces can either be aligned or shifted relative to each other (see col. 3, lines 12-19), either configuration being satisfactory. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to form the surfaces of WO '310 such that they are phase-shifted relative to each other as such configuration is taught to be an equivalent formation by Gurtler.

Regarding claim 2, Gurtler does not appear to disclose the amount of the shift. it is not considered inventive to discover the workable or optimum ranges by routine experimentation absent the showing of criticality for such ranges. See *In re Aller*, 105 USPQ 233, 235 (CCPA

Art Unit: 3673

1955). Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to make the shift in the claimed range.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
